Personal Profile

Hello, my name is Shane Mckenna, I'm a 21-year-old developer from Co.Kerry Ireland. I will graduate from college this year. I have a passion for web development, I'm constantly learning new and exciting technologies.

Work experience

Junior Software Developer

Jan 2017 - Aug 2017

[JRI-America](#)

JRI-America is a subsidiary of the Japanese IT financial services company, Japan Research Institute Ltd. I worked in their Tralee office for 8 months as part of my college degree. While there I saw first hand what it takes to make complex web applications. The majority of my time there was spent working on an internal application with a team of 8-10 developers.

Stack included:

- React, Java, Spring, Oracle DB and WebSphere.

Agile software development:

- Requirements meetings with our client
- Task breakdown sessions
- Two-week iterations
- Daily stand up meetings with local and remote New York team.

Other points of interest:

- Perforce version control
- Atlassian tool suite
- Test Driven Development (JUnit)

Designer

Mar 2012 - Mar 2012

[Walsh Colour Print](#)

This was a 2 week work placement during my 4th year of secondary school. It involved making mock-up ads for our local magazine using Photoshop.

Education

Bachelor of Science Computer Games Development

2014 - 2018

University of Limerick

This is a blob about my time at UL Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fermentum lectus tellus, non iaculis erat commodo eget. Pellentesque lobortis nunc eget urna dictum, quis vestibulum nunc scelerisque. Nam non nibh ullamcorper, ornare nulla eget, rutrum sapien. Quisque tempus libero sit amet lobortis feugiat. Proin a porta magna, in tincidunt enim. Interdum et malesuada fames ac ante ipsum primis in faucibus. Curabitur eget egestas erat.

Interests & Activities

I am very passionate when it comes to music. I love live music and the atmosphere it creates, for this reason, I go to concerts any chance I get.

Improve skills and contribute to open-source projects

Projects

Personal Website

Currently under development.

Features:

Progressive Web Application

Currently under development.

Features:

GraphQL Back-end

Currently under development.

Features:

React Help

Currently under development.

Features:

UX Survey

Currently under development.

Features:

Multiplayer Game

Currently under development.

Features:

All of these projects can be found on my GitHub.
